

LARA FISCHER GODFREY

architectural and interior
designer

ABOUT ME

Born and raised in Paris, France, my love for design has been a constant growing up. I decided to study architecture because of the impact architecture and interior design has on us - the spaces we live in everyday and the ones we simply visit, can have the most impact on our behaviors and mental health. After my studies in some of the most wellknown design schools in the US, I worked in multiple firms in interior design and architecture. This passion for design is not limited to architecture. Architectural studies taught me a great sense of design, but also time management, organization, presentation and leadership, which leads me to be open and curious about every design career that will positively change our world. I am looking for a position that will make me use all my skills and in which I will be able to share my passion for design.
